

FIRST OF A KIND

NEW Terex® Cedarapids CRS6203FV Delivers UNMATCHED Production

The new CRS6203FV Feeder/Screen Portable Plant features our next generation, patent pending LJ-TSV screen. This revolutionary design has the unique ability to vary the screen slope to increase production and handle applications that normally would not be possible with traditional horizontal screens.

Features of the CRS6203FV Feeder/Screen Plant:

- ▶ Patent pending LJ-TSV6203 variable slope screen handles larger deck loads and bigger screen openings
- ▶ Patent pending hydraulic raising module lifts screen up to 10° in 2.5° increments to best fit the application
- ▶ Patent pending screen suspension and stabilization system provides variable slope operation, no-maintenance motion damper and eliminates transport braces
- ▶ Patent pending fines reject system removes excess fines to help achieve in-spec product without additional conveyors
- ▶ Large surge hopper with remote controlled grid and variable speed belt feeder allows loader feed from either side
